What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product

will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Further reference is made to the prospectus that outlines more information of the risk factors of this product.

Performance scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

This table shows your potential returns if you exit after 1 or 5 years, in different scenarios if you put in EUR 10,000 a year. You can compare them with the scenarios of other products. Your return depends on future market performance. Future market developments are uncertain and cannot be accurately predicted.

The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2021 and 2022.

Moderate: this type of scenario occurred for an investment between 2013 and 2018.

Favourable: this type of scenario occurred for an investment between 2016 and 2021.

What happens if OBAM Investment Management B.V. is unable to pay out?

The assets of the Fund are kept separate from OBAM Investment Management B.V. A pay-out of the Fund's assets is therefore not affected by the financial position or possible default of OBAM Investment Management B.V. The financial instruments in the Fund's portfolio have been placed in the custody of BNP Paribas S.A. (the custodian). The Fund runs the risk that the assets held in custody may be lost as a result of liquidation, insolvency, bankruptcy, negligence of or fraudulent activities by the custodian. In such a case, the Fund may suffer a financial loss. However, this risk is limited to the extent that the custodian is required by law to keep the Fund's assets separate from its own. An investor compensation or guarantee scheme does not apply in the event of such a financial loss.

What are the costs?

The person offering to sell you this Fund or advising you on this Fund may charge you additional costs. If so, that person will give you information about those charges and show you the effect that all charges have on your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

| Example Investment 10,000 EUR | if you exit after 1 year | if you exit after 5 years (recommended holding period) |
|-------------------------------|--------------------------|---|
| Total Costs | 151 EUR | 634 EUR |
| Annual cost impact* | 1.5% | 0.9%* |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.4% before costs and 11.5% after costs.

Composition of costs

| One-off costs upon entry or exit | | Annual cost impact if you exit after 1 year |
|--|--|---|
| Entry costs | 0.30% The entry fee is the surcharge on the net asset value of the Fund, charged on subscription. This fee benefits the Fund and serves to compensate for transaction costs incurred for the protection of existing investors in the Fund. The entry fee relates to a maximum percentage. Current entry fees can be viewed via www.obam.nl | 30 EUR |
| Exit costs | 0.30% The exit fee amounts to the deduction from the net asset value of the Fund, charged upon redemption. This fee benefits the Fund and serves to compensate for transaction costs incurred for the protection of existing investors in the Fund. The exit fee concerns a maximum percentage. Current exit fees can be consulted via www.obam.nl . | 30 EUR |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 0.66% The ongoing charges (less transaction costs) consist of a management fee and service fee. The management fee is 0.50% and is to cover management activities. The service fee is determined using a graduated scale and amounts to 0.16% as at the date of this document. The service fee is to cover normal fund expenses such as: administration fees, custody fees, agent fees (fund agent, paying agent, listing agent and transfer agent), accountant fees, marketing fees, tax and legal advisor fees, supervisory fees, costs related to listing and fund governance fees.
